WORK EXPERIENCE

Webyalaya (Humitra Pvt. Ltd.)

QA Engineer trainee

Oct 2025 - Feb 2026

- Conducted performance testing using Locust, identifying database bottleneck causing server downtime and improving system stability
- Performed API testing using Postman, detecting critical issues including 500 Internal Server Errors in summary APIs
- Executed manual and regression testing across key workflows, reporting and tracking defects using Azure DevOps
- Collaborated with developers to resolve high-impact bugs and suggested product improvements and new feature ideas

EDUCATION

Hitkarini College of Engineering Technology

B.Tech in Computer Science Engineering - 7.6 GPA

2022-2026

St. Gabriel Senior Secondary School

Secondary High school - 80%

2022

PROJECT

E-Commerce Test Automation Framework (UI + API + CI/CD)

April 2026

- Built automation framework using Selenium WebDriver and PyTest with POM design
- Automated key UI flows: cart, cart persistence, search_dress, add/remove from cart, signup, login (existing email), logout, and end-to-end checkout
- Performed API testing via Postman + Python (requests): product/brand list validation, search API, login verification (valid/invalid), user registration, update & fetch user details
- Integrated CI/CD using GitHub Actions to trigger automated test runs on push/PR
- Implemented HTML reporting, logging, and screenshot capture on failure for debugging and traceability

AI-Powered Test Case Generator

April 2026

- Developed an AI-powered Test Case Generator leveraging Google Gemini API to automate creation of comprehensive test scenarios, improving test coverage and reducing manual QA effort.
- Integrated a Streamlit-based interface for dynamic input and real-time generation of structured functional, negative, and edge test cases aligned with real-world API testing practices.

SauceDemo Automation Framework

September 2025

- Developed an end-to-end test automation framework using Selenium, PyTest, and Page Object Model (POM), covering 10+ real-world test scenarios including login, cart, and checkout flows
- Implemented reusable components, explicit waits, and assertions to ensure stable and maintainable test execution
- Integrated logging and screenshot-on-failure mechanisms.
- Managed version control using Git and structured framework for scalability and team collaboration

SKILLS

- Automation Testing: Selenium, PyTest, Page Object Model (POM)
- API Testing: Postman, REST API Validation
- Performance Testing: Locust Programming: Python
- Testing Concepts: STLC, SDLC, Functional & Regression Testing
- Tools: Git, Azure DevOps
